

Education, Culture, and Society: Suggested Tracks

Students who major in Education, Culture, and Society are able to customize their knowledge of education and learning based on their career goals. We have created recommended course options for careers that students may pursue in this major. Please note that these are suggestions only, and that students are always able to make the choices they feel would be best for their career options and interests. Any other courses necessary to meet requirements should be chosen in consultation with an academic advisor. We recommend students further develop their skills through internships and hands-on learning experiences.
